

The ReferenceWorks Advantage

June 2001

For more than fifteen years KHA has been the major innovator in homeopathic software creating the easiest-to-use and most sophisticated programs. Years ahead of our competitors, we were the first to offer a graphic interface, the ability to use a mouse, a repertory you can browse on the screen with section icons, customizable analysis strategies and graphs, family and group analyses and case analysis directly through materia medica.

Ten years after ReferenceWorks was released one of our competitors has finally produced a materia medica program with a library that can do rough analyses. The library contains only a small part of the 425 pure materia medica you'll find in ReferenceWorks, it has more than 100 booklets many of which are only a few pages in length and many other books that contain no materia medica at all.

Other programs look similar to ReferenceWorks but don't be fooled; there are many important differences.

® ReferenceWorks' Library E has 250 materia medica that other programs don't have. This includes new material, collections of cured case and provings from cutting-edge authors such as Massimo Mangialavori, Roger Morrison, P. Sankaran, Jose Mirrilli, Richard Moskowitz, Anne Schadde, Nandita Shah, Jayesh Shah, Asa Hershoff and Edward Whitmont to name but a few.

® Library E has six additional repertories including Knerr, Boeninghausen, Boericke and van Zandvoort's Complete Millennium Repertory. These repertories are important to have as they often contain information and rubrics not found elsewhere.

® Library E has *thousands* of additional journal articles including five years of Homeopathic Links and twelve years of the Homeopathic Recorder. Our journal articles are carefully selected to help you cure your cases; you won't find meeting dates, letters to the editor, etc - just pure materia medica.

® Library E has 21 collections of cured cases from respected contemporary homeopaths such as Mangialavori, Mueller, Italiano, Heron, and five years of the International Foundation of Homeopathy's Case Proceedings to help you understand how and why each remedy was prescribed.

® Library E even has a collection of natural history books to help you research the substance behind the remedy.

When you examine the search engines that come with the different programs the differences become even clearer. First of all, ReferenceWorks is beautiful and a joy to use. Secondly, if you're in a tough situation where you need to combine complex words and phrases to model an unusual concept you have to use ReferenceWorks.

And one of the most powerful, valuable, practice-changing aspects of ReferenceWorks is that you can export any search as a rubric to use in your repertory analysis. Since ReferenceWorks typically finds 3-6 times more remedies for any symptom than is found in a repertory, this is an extremely powerful feature to help you solve your cases.

These are just a few of the reasons why virtually every respected, cutting-edge international teacher has chosen ReferenceWorks.

Books Unique to the ReferenceWorks Library

PROVINGS

AZAR & MARLOW-FRIES: RUBY PROVING
BLACK, G: VISCUM ALBUM, THE COMMON MISTLETOE
BRADFORD TL, INDEX TO HOMEOPATHIC PROVINGS
CENTRAL COUNCIL FOR RESEARCH IN HOMEOPATHY: PROVINGS
COLLIER, C. & DAVIS, J: LAVENDER PROVING
