

User Fact Sheet

Significantly reduce lab storage problems

Bio-bin® Fast Facts

- Space efficient fold-flat design
- Reduce waste disposal costs due to reduced waste weight and improved waste segregation
- UN 3291 approved container

As a result of the support of Alan Crooks from our Northern Ireland distributor Vector Scientific, the **Bio-Bin®** is now in use at Northern HSC Trust Laboratories. Biomedical Scientist and Laboratory Health and Safety Officer David Wright and his staff are currently using several hundred per month of the 5 litre yellow **Bio-Bins®** for clinical waste disposal in their laboratories.

UN 3291 approved

No Sharps

The haematology, biochemistry and microbiology departments at the hospital have all adopted the **Bio-Bin®** system and incorporated it into their existing waste stream whereby the waste is ultimately sent to the Trust's eco-friendly alternative technology plant to be heat treated.

The **Bio-Bin®** is used in a variety of laboratories all over the country including the Health Protection Agency, Queens Medical Centre and Imperial College London. **Bio-Bin®** 6Ltr Pipette is ideal for disposing of serological pipettes whilst the smaller bins are perfect for loops, swabs and pipette tips.
