

Bio-bin[®]

Bio-bins available from August 2008 onwards will include some **new** developments

Fold-flat - New

1Ltr and 5Ltr Bio-bin delivered folded flat, other sizes to follow.

Printed user instructions

Simple instructions on how to seal the Bio-bin[®]

Bio Hazard

Not present on Tiger stripe bin to allow disposal of waste in the most cost effective way

No sharps

Only used for non-sharp infectious waste

No Sharps

Stackable pre and post use

Delivered stacked inside each other, making them very space efficient. Once sealed down they can be stacked on top of each other.

Absorbent Bio-matt[™] - New

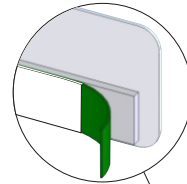

Every Bio-bin[®] will come with a removable Bio-matt. This will absorb liquid and turn it into a gel in minutes.

Temporary Seal - New

When lid is folded down press here to temporary seal

Permanent Seal

Peel off release paper and fold down lid to permanently seal

Built in lid

Push inwards here to close lid

Light weight

Weights up to 65% less than plastic alternatives

UN approved

passed UN drop tests

UN 3291 approved

Water proof construction

96% paper construction with a very thin coating of plastic laminated to make it water proof inside and out. Heat sealed joints prevent any leakage

Colour coded - New

Bio-bin[®] is available in 4 different waste disposal colours, helping you to segregate your waste.

- Tiger Stripe - Orange** - Offensive/Human waste
- Orange - Yellow** - Low risk infectious waste
- Yellow - Purple/Yellow** - High risk infectious waste
- Purple/Yellow** - Cytotoxic/Cytostatic

To use Bio-bin®

Stacked
Bio-bins come stacked which means more space efficiency

- Remove a Bio-bin from stack

Fill line

Do not fill above line to prevent overfilling

- Deposit non-sharp waste inside
- When full seal down (take note of fill line to prevent overfilling)

Waste information

To be filled in by user with type of waste, where it was created and when it was disposed of etc.

- Stack ready for disposal

Handle - New

Includes a small hole which allows an identification tag to be attached

Press here

To temporary seal

- Push sides inwards and fold down lid
- Fold over flap and press mushroom lock together where it states 'press here' to temporary seal

Peel release paper

To permanently seal

- Remove Release paper
- Fold down as before and stick tabs down to line up with print on side of box

Flat top

Bio-bin can be stacked post use

To dispose of Bio-bin®
