

User Fact Sheet

Compact clinical waste solution for Urology

Bio-bin® Fast Facts

- Space efficient fold-flat design
- Ideal size for single patient use allowing quick disposal
- Available through NHS Supply Chain E-direct

Staff nurses Hannah Kamkar (left) and Louise Adkins use the 5 ltr **Bio-bin®** in a treatment room

Sister Sue Beaumont and staff nurses in the Urology Outpatients Department at Sheffield's Royal Hallamshire Hospital are now successfully using the 5 litre purple and yellow **Bio-bin®** for their cytotoxic waste produced during the treatment of bladder cancer.

UN 3291 approved

No Sharps

The nurses have found that the design is ideal as they can use one **Bio-bin®** per treatment without having too much wasted space as they have found with some of the larger sharps containers. Sister Sue Beaumont finds it very convenient to be able to order the **Bio-bin®** through NHS Supply Chain.

Other customers wishing to order through Supply Chain can do so using the order codes below:
