H-10 caring for your horse

Christopher Cook enlisted the help of a scientific colleague to form H-10 Limited in 2001. Originally formulated to be used on humans, **H-10™** Ointment has had some spectacular successes when used on various animals (including many endangered species) in zoo collections. After treating such animals as an orang utan, golden lion tamarin, pink pigeon and a Bali starling, the company decided to focus on animals - and horses in particular.

The current range of **H-10™** products is specially formulated to maintain a horse's skin and coat in a healthy condition. The **elegance™** product range is designed to keep a horse's coat, mane and tail in top show condition. Our aim is to produce top quality products at affordable prices enabling horse owners to use high-grade skin care and competition preparation essentials that they can trust.

If you have any comments or recommendations about our products we will be pleased to hear from you.

"We have tried both the new Elegance Concentrated Shampoo and the Coat Gloss from H-10 Limited. The results are very pleasing, the Elegance Concentrated Shampoo made the ponies' coats look great - clean and with a terrific shine. The Coat Gloss ensured the manes and tails were easy to comb through with no sticky traces. We are going to use the products on all the ponies for the coming show season."
