

HappiRoot® GRANULES

Products

75g Pack

Stores more than 1 litre of water.

HappiRoot's remarkable ability to store water and release it to the plant roots as required make it an ideal additive to compost. By enhancing water retention and soil aeration it reduces maintenance and keeps plants happier for longer!

Happiroot® is unique to Smart Tech Ltd and is a patented neutral polymeric material.

Happiroot® is one of a family of hydrogel-forming biocompatible polymers developed by Smart Tech Ltd. HappiRoot Granules make an ideal additive to compost assisting retention of water and soil aeration. Happiroot® can be recycled in compost and will retain their properties after composting at temperature.

Happiroot® will biodegrade safely in the environment. The process is accelerated by sunlight and the presence of water.

Patented - Manufactured in the UK.
