

Instructions for use . .

1

Place a SmartCushion® into the base of the container.

Add the quantity of water recommended for the size of SmartCushion®, and allow a few minutes for water to be absorbed.

2

3

Add soil or growing medium to the container and pot the plant(s) as normal keeping the soil a few inches below the rim of the container.

Water-in the plant as normal.

4

5

Test manually, or use a moisture meter, and when the top quarter level of the soil feels dry add the recommended quantity of water from the top.

## SmartCushion®

Plant Watering Systems

SmartCushion®	SIZE mm	Recommended Quantity of Water
SMALL	150 x 150	0.5 litre
MEDIUM	300 x 300	5 litres
LARGE	400 x 400	10 litres
RECTANGULAR	850 x 250	10 litres
CONICAL	160Ø x 160	1.5 litres

The **SmartCushion®** is an environmentally friendly, water efficient, low maintenance system, which with our unique **HappiRoot®** material provides controlled release watering at root level eliminating watering problems.

The **SmartCushion®** patented watering system simplifies plant care and can at least double the watering interval providing stunning plant displays.

**SmartCushion®** is available in a range of sizes for greenery, flowering plants, shrubs and trees, can be used in planters, troughs, hanging baskets, tabletops, flower towers, pouches and much, much more...

**Reusability & Recycling.** SmartCushions can be steam sterilised for reuse. At the end of life the **HappiRoot®** contents make an ideal additive to compost. HappiRoot will eventually degrade safely in the presence of water and sunlight. The outer lining may be disposed of in normal waste.
