

SmartReservoir®

PLANT WATERING SOLUTION

SmartReservoir® **HappiRoot®**
Products

Typical Application

Place SmartReservoir in container & add water to cover swollen reservoir. Place potted plant on top.
Patented - Manufactured in the UK.

Environmentally friendly controlled release watering at root level eliminates watering problems.

WATERING SUGGESTIONS

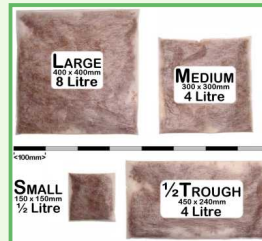

SmartReservoir® can be successfully used with all types of houseplants, and also outside in hanging baskets, tubs etc. It is an ideal solution to holiday period watering.

WATER SAVING

These new and exclusive patented watering systems, can save up to 50% in water usage. They simplify plant care and at least double the watering time interval, providing stunning plant displays simply and easily.

When immersed in water or liquid feed, the SmartReservoir® absorbs amazing amounts, over 10 times its weight, within its unique structure, providing both air and water as required to sustain plants at root level. The SmartReservoir can be potted up or placed under the base of a plant pot.

The SmartReservoir® will absorb ½ litre of water.

Larger sizes of SmartReservoir may be obtained from Smart Tech Ltd.

Outside application.
