CRUISER 2650 /O EXPRESS

**MERCURY**  
#1 On The Water

WHEN YOU'RE READY  
FOR SOMETHING MORE.

For some, a day on the water is good enough. But that's not you — you want more. More time on the water. More space on your boat. More luxury and more power. Now there's a boat that gives you all this and more — Starcraft's Cruiser Express. Designed for big water, the Express features Starcraft's exclusive wide track, reverse chine hull for a smooth ride, even in open, choppy water. On deck you'll find more than enough room with port and stern bench seats and a starboard lounge. There's plenty of style and comfort, too, with upscale features, such as snap-in carpet, a bucket helm seat and an integrated swim platform

with rear entry. Add one of the optional cockpit entertainment packages for even more luxuries such as a cockpit sink and slide-out refrigerator. When you're finally ready to call it a day, retire down to the lavish cabin. Again, there's more than enough room. In fact, you'll discover a galley kitchen, a full bathroom with shower and a spacious queen-sized bed. In addition, the bow dinette features stowable tables and converts into a V-berth with a six-foot bed. You also have the option of adding a bit of entertainment like a flatscreen TV with DVD player. Not exactly what you call "roughing it."

"1 On The Water"

2650 I/O EXPRESS

**HEAD.** The luxury continues in the bathroom. It features an electric quiet-flush toilet, hot and cold running water at the stainless steel sink and a pullout faucet for showers. Roomier than you might expect, the bathroom also features lots of storage throughout.

**STERN SEATING.** There's always room for friends aboard the Express thanks to spacious and comfortable L-shaped stern seating. A rear entry ladder and platform make getting in and out of the water easy so everyone can enjoy taking a quick dip.
